WEB-BASED SOFTWARE DEVELOPER/PROGRAMMER
SAMPLE JOB POSTING

(School District) is seeking a highly experienced web-based software developer/programmer. This individual will be contracted to provide enhancements/updates to an existing customized software solution; a database-driven instructional management system. This individual will have a fundamental role in the district and must possess:

- Two or more years of software engineering and/or web development experience.
- Clear communication.
- A friendly, flexible and helpful disposition (vital due to the levels of people they will be working with).
- Strong programming skills.
- Effective organizational skills to manage tasks, deadlines, and fluctuating workloads.
- Promptness and efficiency.

Platforms:
- Desktop/Laptop: Macintosh OS X and Windows XP.
- Servers: Novell, Windows, Microsoft Internet Information, Microsoft SQL.

Languages/Technologies:
- HTML/DHTML.
- Microsoft Active Server.
- PHP.
- SQL Query Analyzer, Profiler, and Import/Export Wizard.
- Experience integrating ASP and PHP with database connectivity for web applications.

Other Background:
- Visual Design, Human-Computer Interaction, Microsoft Excel and Access.
- Experience working with K-12 education and curriculum helpful.
- Ability to demonstrate advanced knowledge in the above skills is a must.

Interested parties should respond with a resume or other documentation of the credentials of the person or persons who will provide this service. Include one or more hourly quotations based on these annual ranges:

100 -180 hours; 180-270 hours; 270-360 hours
