Forecast of Major Taxes

- Individual Income Tax Annual Payments are expected to decline in FY16 from the large one-time capital gains driven increase in FY15.
- Gasoline prices are not expected to drop again like they did in FY15, so sales tax revenue is expected to grow in FY16 - FY17.
- SET is expected to continue to grow, but it will grow at a slower rate in FY16 due to low inflation.
- MBT net refunds are expected to peak in FY16 and CIT is expected to grow through FY18.

Michigan Business Tax & Certificated Credits

- The MEDC/Treasury system to track certificated credits is working well.
- MEDC notifies Treasury when a business qualifies for a certificated credit.
- Treasury builds this information into their revenue estimates.
- Businesses must file the certificate with Treasury to receive a refund.
- However, some certificates are not filed as soon as expected.

Estimating MBT Net Refunds

- In FY15, MBT net refunds were \$112 million short of the May estimate.
- This reflects a timing issue, not a reduction in MBT refunds.
- Most of the \$112 million in credits have already been filed in FY16.
- While MBT net refunds were smaller in FY15 by \$112 million, they will be up by \$112 million in FY16.

Insurance Tax

- Insurance companies pay into several special funds to help pay certain benefits.
- The Insurance Tax provides insurance companies credits for many of these payments.
- PA 204 of 2012 (amended Insurance Code) moved the administration of one of these funds from the Secretary of State to the MAIPF.
- No credit was provided for the payments to the Secretary of State, but payments to a fund administered by the MAIPF has qualified and continues to qualify for a tax credit.

Insurance Tax (continued)

- In FY15, insurance companies began claiming credits for their old and new payments to the MAIPF.
- This reduced insurance tax collections \$60 million in FY15 and will reduce them an estimated \$80 million in FY16 and after.

Major Revenue Estimate Revisions Compared to May Estimates

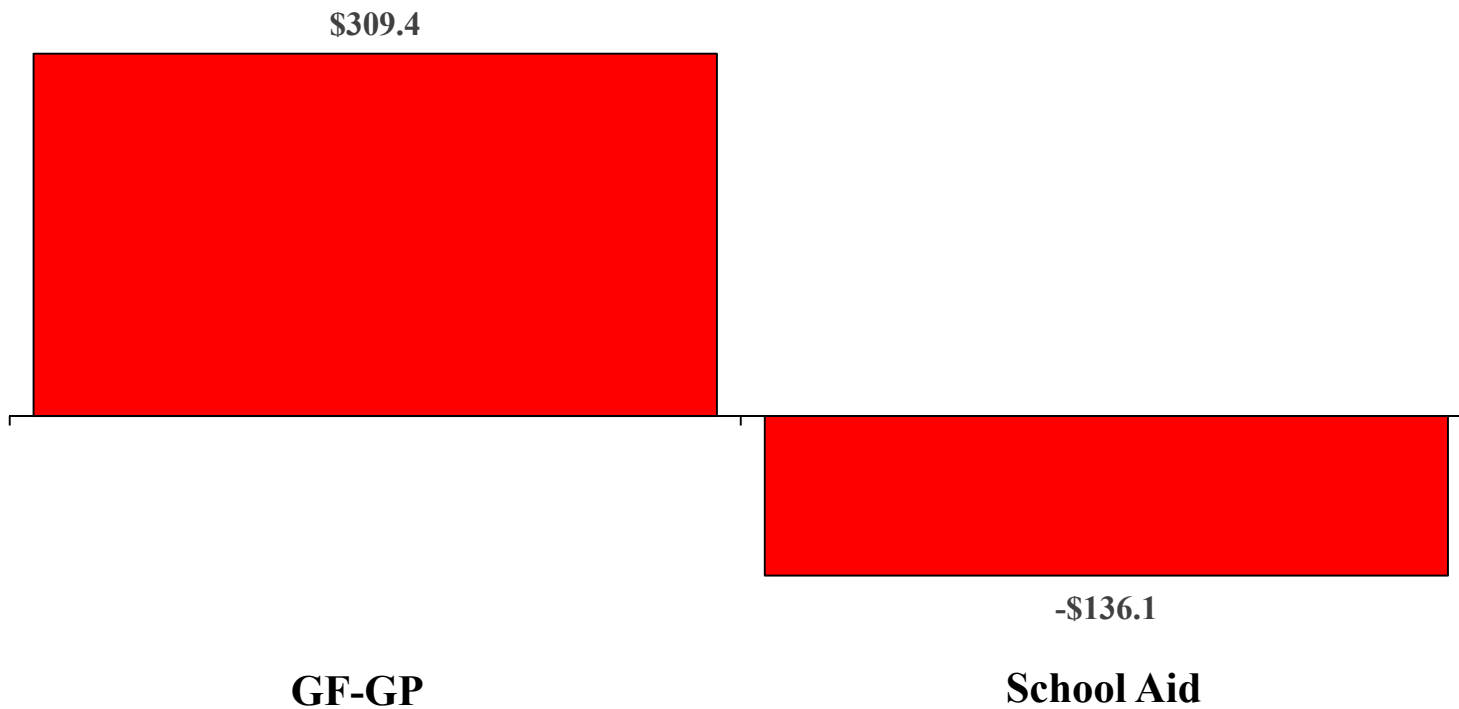

- \$112 million in MBT refunds were moved from FY15 to FY16.
- Additional credits being claimed by insurance companies is reducing insurance tax: \$60 million in FY15 and \$80 million in FY16 and after.
- Tax litigation court decisions are reducing use tax \$60 million in FY16, \$15 million in FY17 and \$25 million in FY18 and MBT \$18 million in FY16.

Major Revenue Estimate Revisions Compared to May Estimates (continued)

- Larger lottery jackpots will boost lottery revenue an estimated \$20 million.
- Newly enacted data center sales and use tax exemption will reduce revenue \$11 million in FY16, \$15 million in FY17 and \$16 million in FY18.

Budget Stabilization Fund

- In FY 2016, the Agencies estimate pay-ins from \$246 to \$265 million.
- In FY 2017, the Agencies estimate pay-ins ranging from \$171 to \$229 million.
- In FY 2018, the Agencies estimate pay-ins ranging from \$0 to \$58 million.
- No BSF pay-outs are estimated by any of the Agencies during FY 2016, FY 2017 or FY 2018.

Constitutional Revenue Limit Calculation

Billions

Forecast Risks

- International issues (political and economic)
- At what pace will Fed raise interest rates?
- Oil price uncertainty
- How will consumers react to international issues, interest rate increases, oil price changes, etc. and how will this impact sales tax?
- Housing: will more consumers take on financial commitment?
- MBT, CIT, Insurance Tax uncertainty
- Income Tax Annual Payments
