

What if?

What if you could provide stress-free online payment to your parents? What if you could organize payment reports in any way you could think of? What if you could have a solution that's proven, reliable, and supported by a team of dedicated experts?

PayForIt.net

**Online payment,
for today's parent.
The solution is here.**

Offer lunch and other meal payments online, 24/7, in a secure environment. Provide fee-payment options, for school items and activities, in a way that's powerful and easy to use. Interface with any student-information system with confidence. PayForIt.net can offer your district all of these things and more.

We can't wait to work with you.

Whether you'd like to schedule a demo, or just get a question answered, we'd be happy to hear from you.

PayForIt.net

**Online payment.
For today's parent.**

The next generation
of **PaySchools**
Online Payment Processing System

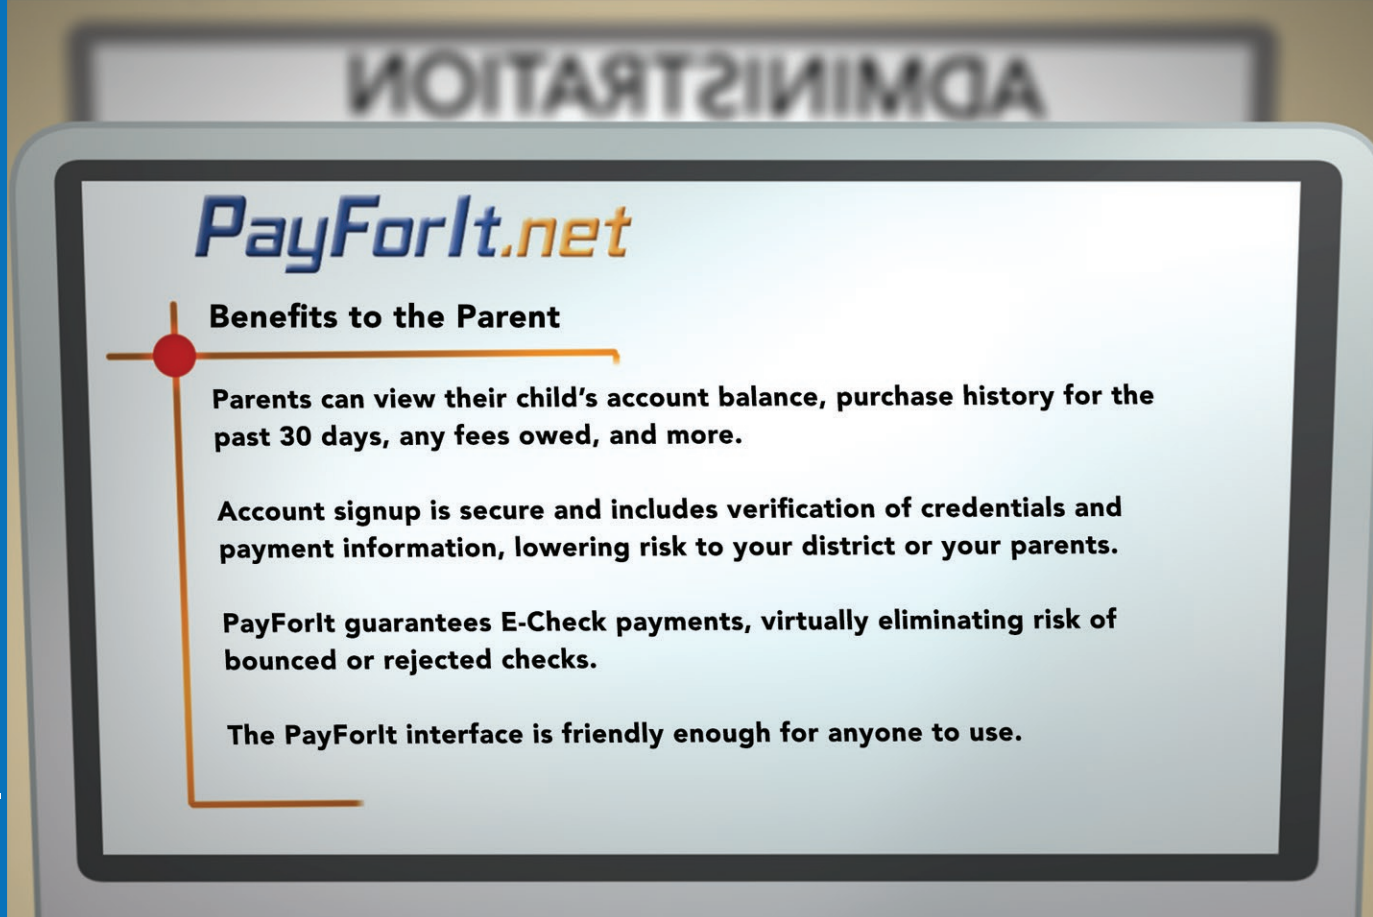

PayForIt.net is the answer to your school district's online-payment needs: meals, fees, activities, equipment rentals, and much more. Here's why:

PayForIt interfaces with any student-information system...even if it's not one of ours.

Student information updates can happen automatically, with no regular maintenance work needed from your district.

Site, account, and payment security means fewer inquiries or issues from users.

**Online payment,
for today's parent.**

Student information is indexed in many different ways, allowing for seamless (and yet detailed) reporting capability. Any report can be offloaded to a spreadsheet or PDF.

PayForIt is accessed through a single website signon, making setup and usage simple.

Configure your payment options in a number of different ways: single payment or installment, immediate payment or scheduled payment, universally available fees to student-assigned fees, or any combination of these. The choices are endless.

We'd love to tell you more. Contact Bob Reolfi at bobr@ecrpos.org, or at (800) 669-0972, to schedule a personalized demonstration.
