Certified Pool Operator's Course

The curriculum, course manual, and certification exam are prepared and provided by the National Swimming Pool Foundation. This insures nationwide standardization of training in the rapid technological advancements of pool operation, maintenance, and management.

Upon successful completion of this course, the graduate will receive a wall certificate and a wallet card from the National Swimming Pool Foundation showing his/her recorded and permanent ID number. This permanent proof of the graduate's qualifications is subject to updating every five years.

MSBO has teamed with a group of instructors who bring you years of practical experience in the field, a thorough knowledge of course material, and proven presentation skills. These instructors are front line practitioners in pool consulting, design, and safety enforcement. Their practical knowledge is priceless.

This certification is valid for 5 years.

In cooperation with

July 19–20, 2017

MSBO

1001 Centennial Way, Suite 200

Lansing, MI 48917

Registration 7:30-8:00 am, July 19

Course hours 8:00 am - 4:30 pm

Senior Instructors

The presentation of each topic is given by an instructor who practices this skill in the "real" world. Design & calculations, pool safety & disease control, as well as mechanical and chemical pool maintenance are presented by practitioners in each field.

Passing the Certification Exam is a goal of this class and the entire staff is available for assistance in preparing for its successful completion. However, it remains our prime objective to introduce our students to the body of knowledge required to operate as a true professional.

Gil Daws

Gil has over 30 years of personal experience in providing education, design, and construction consultation, project management, and feasibility studies to the pool industry of Michigan. He has been a Certified CPO instructor for 20 years. A member of Michigan Environmental Health Association (MEHA), he has served on both the Epidemiology Committee and the Swimming Pool Committee. Years of public speaking before county and state health departments, school districts, and professional organizations ensure the course is a rewarding experience for all students.

Mary de Tar

A Certified CPO instructor, Mary has been assisting in this series of classes for several years. An architectural designer by trade, she brings an understanding of math and mechanical systems to the Calculation and Equipment sections of the program.

Topics Covered

- ✦ Swimming pool/spa codes
- ✦ Swimming pool calculations
- ✦ Filters & filtration
