EPA Region 5 wants to help your school identify and address indoor air quality (IAQ) issues by conducting an IAQ assessment. To take advantage of this opportunity, we ask you to send an email confirming your interest in having an IAQ Assessment of your building(s) and to identify a point of contact (POC) to work with EPA.

The POC coordinates the entire assessment with EPA, provides access to all locations, and provides follow-up to EPA after the assessment including information on recommendations adopted.

For more information, please contact:

Jeanette Marrero, BS
Environmental Engineer
(312) 886-6543
marrero.jeanette@epa.gov

Sheila Batka, MS
Environmental Engineer
(312) 886-6053
